ABOUT ME

Web developer, with a solid graphical and visual universe, passionate about digital arts and communications technologies. Curious, resourceful and meticulous I like to learn continuously and excel at every moment. My training and my experience in communication and multimedia allowed me to acquire the necessary skills for audio-visual creation. In addition, my recent training at BeCode, between August 2019 and December 2020, allowed me to enrich my technical profile by discovering and deepening the web, the code and its different languages.
